SUMMARY

Final-year Computer Science (AI) student with experience building backend systems, REST APIs, full-stack applications, databases, and AI/ML pipelines including Retrieval-Augmented Generation (RAG) and model fine-tuning. Completed internships in speech and voice AI at Advantal Technologies and QuibbleAI. Seeking a Software Engineering or AI internship to build production-grade systems.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL (Postgres), JavaScript, HTML/CSS
Frameworks: React, Node.js (Express), Flask, FastAPI
Database: PostgreSQL, MySQL, MongoDB, Schema Design
Cloud Services: AWS (EC2 and S3), Google Cloud
Developer Tools: Git, Docker, Postman, Jupyter Notebook, VS Code, Visual Studio, IntelliJ, Linux
AI/ML: LangChain, RAG Pipelines, Model Fine-Tuning, Hugging Face
Libraries: Pandas, NumPy, Matplotlib, Scikit-Learn, OpenCV, Requests

EXPERIENCE

Trainee Mar 2026 – Apr 2026
Advantal Technologies Ltd. Bengaluru

- Led a 10-member team to complete a waterfall SDLC for a speaker and voice recognition project
- Developed a backend system in Spring Boot to connect the frontend with the required models from Hugging Face
- Explored ways to fine-tune the models and made a CLI I/O in Red Hat Enterprise Linux

AI Intern May 2025 – Aug 2025
Quibble AI

- Improved response coherence and reduced hallucination rate by 50% through EDA and output validation
- Analysed customer usage datasets to surface behavioural anomalies, directly informing model retraining priorities
- Worked with developers to integrate backend service connectors between AI models and voice output channels

PROJECTS

Comorbid Copilot | *Node.js, React.js, IBM Watson, FAISS, LangChain, RAG, Hugging Face* Github

- Architected a Retrieval-Augmented Generation (RAG) pipeline over a medical dataset of 8,000+ records, achieving 70–80% response accuracy for comorbidity decision support
- Designed and implemented 5 RESTful API endpoints handling document ingestion, vector search (FAISS), and LLM response generation via LangChain
- Built a responsive interface to store and communicate effectively and in a structured way with the model

Apartment-Ease | *Python, Flask, MySQL, JavaScript, REST APIs* Github

- Built a multi-role web system (resident, worker, admin) with Flask REST APIs and session-based auth, handling concurrent service requests across all user roles
- Designed a relational schema in MySQL supporting concurrent multi-role interactions
- Handled real-time queries through an AI chatbot

ACHIEVEMENTS

Leetcode 250+ problems solved | Contest Rating: 1650+
InC4'26 research publication on Continual Learning in Neural Networks

EDUCATION

Manipal Institute of Technology Bengaluru, KA
Bachelor of Technology in Computer Science (AI), Minor in Quantum Computing Aug. 2023 – May 2027

CERTIFICATIONS

IIT Kanpur: Cloud Computing and Distributed Systems
Meta: Backend Professional Certificate
Google: AI Professional Certificate
